Things to Know

Disclaimer

Many seeds shared by this Seed Library were grown by community members with love and care like our ancestors have done for thousands of years. Please know they may not meet state germination or labeling standards.

The Seeds for Sharing Library cannot guarantee the germination rates or purity of the seeds provided. Seed saving and gardening carry an element of chance. If you should check out seed that doesn't come true, please let us know by sending an email to the library.

Many of our seeds have been donated by seed companies and we keep it until it reaches its expiration date. It is not for resale.

We do not knowingly accept or share any seeds that are chemically treated, patented, or genetically modified.

Seed Farm

We have a seed farm at New Urban High School, 1901 SE Oak Grove Blvd. You can volunteer any Monday at 3:00 pm or Thursday between 9:00 am and noon between February and November. For more information email seedsforsharing@gmail.com or go to:

Facebook: Seeds for Sharing Library and Garden

Facebook: Oak Lodge Library

Abbreviations

AoT = Ark of Taste variety; Slow Food Movement

AV = Adaption Variety aka Modern Landrace/Grex

F1 = hybrid. Do not save seeds from plants you grow from these seeds. They will not produce the same plant.

PPL = Native plant that is on the Portland Plant List

OSSI = Open Source Seed Initiative. OSSI was created by a group of plant breeders, farmers, seed companies, and sustainability advocates who want to free the seed! OSSI

works with plant breeders who commit to making one or more of their varieties available exclusively under the OSSI Pledge. If you see OSSI in a listing, the "pledge" in the next paragraph applies to it.

You have the freedom to use these OSSI-Pledged seeds in any way you choose. In return, you pledge not to restrict others' use of these seeds or their derivatives by patents or other means, and to include this Pledge with any transfer of these seeds or their derivatives.

This "copyleft" commitment ensures that the Pledge is transmitted with any further distribution of the seed or the seed of any new varieties bred from it. In this way, OSSI preserves the unencumbered exchange of plant germplasm for breeding purposes and guarantees the rights of farmers and gardeners to save and replant seed.

For more information about the Open Source Seed Initiative, see www.osseeds.org

Helpful Gardening Calendars & Guides

Portland Nursery Vegetable Calendar

Territorial Seed Company Growing Guides

https://territorialseed.com/blogs/spring-growing-guides

Please save seeds for the library!

The best seeds are your locally grown seeds. The more times you plant, save seed, and plant again, the more adapted the seed is to our changing environment.

There is a Seed Saving Return form available:

- On top of the seed cabinet at the library
- Last page of this document – print, cut it apart and complete it

Please turn in your seeds and seed return form to the front desk at the library.

Flowers

This table shows how many packets of each variety are available at Oak Lodge and Gladstone libraries and of those packets, how many are locally grown. A packet may contain only a few seeds, or it may be stuffed with seeds. Typically, the locally grown seed packets have more seeds than the commercial seed packets. Note that when we receive more than one seed packet of the same variety and year from a seed company, we combine them into one packet.

Herbs

This table shows how many packets of each variety are available at Oak Lodge and Gladstone libraries and of those packets, how many are **Local** (locally grown) and how many are Adaptation varieties.

A packet may contain only a few seeds, or it may be stuffed with seeds. Typically, the locally grown seed packets have more seeds than the commercial seed packets. Note that when we receive more than one seed packet of the same variety and year from a commercial seed company, we combine them into one packet.

An **adaptation variety** is a locally grown, genetically-diverse, promiscuously-pollinated, survival of the fittest crop that fosters food security and community. It is a blend of many varieties and has incredible vigor. It is highly adaptable to a changing growing environment.

Plant and Variety	Oak Lodge	Gladstone	Local	Adaptation
