Background

As part of Clackamas County's Behavioral Health Redesign, which began in 2009, Clackamas County Behavioral Health Division committed to the development and implementation of a Peer Delivered Services System of Care for children, families, transition age youth, and adults receiving mental health and addiction services.

The term "peer" refers to a person who self-identifies as an individual who has lived experience of a mental health condition and/or an addiction and is successfully living in recovery. Peers provide support to an individual who has similar lived experiences. Peer support services are developed by peers for peers.

Family peer support refers to support activities provided by a person who has had similar lived experience raising a child who has experienced a mental health condition and/or addiction. The support services provided have been developed by family members for family members.

The supports provided are defined by the person/family asking for support. The individual/family defines their interests and goals and sets tasks to achieve those goals. The peer provides the support needed to complete those tasks and achieve the goals. Peer support services are designed to be flexible and community-based to meet the unique needs of each individual/family.
